Game Tips

The rules for NBA STREET Vol. 2 are pretty simple, yo. The ultimate goal is to win. However, everybody knows that it feels much better to win big. Sure, you can shoot a lazy jump shot, but why not set it up with a few Trick Moves first? Or better yet, put together a series of Trick Moves and then slam it in your opponent's face with a nasty dunk or Alley-Oop.

Trick Moves

Trick Moves not only make you look tight on the court, they can help earn Trick Points as well. Trick Points in turn can help build up your Gamebreaker Meter as you ball and style your way to a Gamebreaker. But don't forget that Trick Moves can be just as easily countered by the opposition. Below are a few Trick Moves to help your game.

Fakeouts

Fakeouts occur as a result of a successful Trick Move. When a Trick Move fakes a defender out, he stumbles or falls, suffering extra embarrassment and scoring additional Trick Points for the ball carrier.

Dunks

Show your opponent up with an authoritative slam dunk. The object of the game is to score, so why not bring it home with a nasty, in-your-face dunk? There are several levels of dunks: from basic to really advanced. The more advanced dunks score correspondingly more Trick Points when performed.

Alley-Oops

One of the advanced dunks is an Alley-Oop. When you're on offense, look for your teammate who has an open lane to the basket. Assuming he has hops, he will sky over the basket anticipating the pass. However, it's up to the ball handler to feed him the rock.

To complete an Alley-Oop pass, press the X button when your teammate flies toward the rim. Success depends on timing so don't pass the ball too early or too late. The dunking skills of the receiver and the reaction of the defense also play big parts in the completion of an Alley-Oop.

Hook-Ups

You can "Hook-Up" a teammate by passing the ball during a dunk or Alley-Oop to a teammate who is "Alley-Ooping" above you. This scores huge Trick Point bonuses. When you're above the rim, look for your teammate jumping above you for an Alley-Oop. Don't be a glamour hog—pass it.

Pulling off a Hook-Up is similar to finishing off an Alley-Oop. Just press the X button during your move to the basket while your teammate is above you.

Starting A Combo

Combinations of Trick Moves that are linked together to create a cool play can also run up your Gamebreaker Meter. The plays include Fakeouts (a Trick Move that causes your opponent to stumble), mid-air dishes, blocks, picks, steals, kick passes, dives, shots from beyond the arc, dunks, lay-ups, and Alley-Oops. Nearly every Combo requires you to score, and the only exceptions to the scoring requirement are defensive Combos featuring blocks. When you score a Combo, a text overlay appears at the bottom of the screen telling you which moves were linked.

Combo Scoring

Combos are the best way to rack up Trick Points. By combining two or more moves in a row, the Combo adds the total value of all moves contained in the play and then adds an additional multiplier bonus for the Combo itself. Higher scoring moves result in bigger Combo scores. The only exceptions to this rule are the Trick Moves that do not result in Fakeouts. These continue the Combo but don't add the multiplier bonus that other moves do.
**REPEAT MOVES**
If you continually repeat the same Trick Move, the Trick Points you receive are cut down. Mix it up to score maximum Trick Points.

**TURBO METER**
Each Turbo move decreases the amount of energy on your Turbo Meter. The higher the level of a move, the more Turbo it costs.

**GAMEBREAKERS/GAMEBREAKER METER**

Increase your team's Gamebreaker Meter by pulling off sick Trick Moves, mad Combos, and nasty dunks. Once the Gamebreaker Meter is completely full, you're awarded with a "Gamebreaker." At this point you have the opportunity to score a wicked basket unlike any other. However, you have a limited time to shoot a Gamebreaker so be sure to bust it out before time winds down.

If you make the Gamebreaker shot, the shot scores points for your team while deducting points from your opponent. How cool is that? Once a Gamebreaker has been shot, or if the time runs out, the meter empties and you start over again building it. The Gamebreaker Meter also empties itself if you do nothing to fill it up. And remember, your opponent can subtract from your Gamebreaker Meter by pulling off blocks and steals.

**GAMEBREAKER DUNKS AND SHOTS**
The Gamebreaker adds a bonus to the player's base rating for shooting or dunking. So the better a player is at long-range shots, the higher their chance of hitting a Gamebreaker from long range. Likewise, the better a player is at dunking, the higher their chance is of completing a Gamebreaker dunk. Gamebreaker dunks and short-range shots are worth one point and take one point from your opponent (two-point swing). Long-range shots are worth two points and still take one point from your opponent (three-point swing). Dunks are worth more Trick Points than other shots.

**POCKET GAMEBREAKER**
If you want to get greedy, you have the option to pocket your first Gamebreaker shot in order to acquire a second, over-the-top "Level 2 Gamebreaker" shot. Level 2 Gamebreakers (aka GB2s), are worth twice the total point swing as the original Level 1 Gamebreaker ("Gamebreaker Point Breakdown below) and up to five times more Trick Points. The best Combos in the game will always end in a Level 2 Gamebreaker dunk.

To pocket a Gamebreaker, press the SELECT button once the Gamebreaker Meter lights up for your Gamebreaker (you must have possession of the ball). Once it has been pocketed, the Gamebreaker Meter illuminates indicating that you have pocketed a Gamebreaker.

**CANCEL GAMEBREAKER**
To keep your opponent from scoring the devastating Level 2 Gamebreaker against you, just cancel his pocketed Gamebreaker. This is a great way to frustrate your opposition just when they are about to get the big play.

To cancel a pocketed Gamebreaker press any Turbo button + the SELECT button once the Gamebreaker Meter lights up for your Gamebreaker. You must have possession of the ball and your opponent must have a pocketed Gamebreaker.

Be A Legend
Experience the life of a Street Legend. Will you be remembered as one of the all time greats?

Note
Before you can begin playing Be A Legend mode, you must first create a baller of your own. Choose BE A LEGEND from the Play It menu and follow the instructions in the Create A Baller section before continuing on. Once your baller is complete, highlight the created name from the Choose Baller screen and press the button. Be A Legend mode begins.
Before the Game
In Be A Legend mode, you start out as an absolute nobody. Your journey begins at the neighborhood Rec Center; just playing against the local ballers. Show you've got what it takes and soon you'll be touring the country to take on the best America has to offer.

The Map
From "The Map," your life as a legend begins. Event 1 starts out at the Rec Center in New York City. Pick up two teammates to play with, create a city name, a team name, and choose a logo for your squad. Then head out to the court for your first game.

PROGRESS
After each victory, you earn Progress. Earn enough and you'll be able to unlock other venues and other challenges. There are courts available nationwide but you must earn the right to play on them first.

STREET CHALLENGES
Besides the casual Pick Up Games and official Tournaments there are also Street Challenges spread across The Map. These special events have their own sets of rules and types of play. You don't earn Progress for Street Challenges but each one gives you the chance to unlock surprise rewards.

After the Game
After the game, check out your team and player game stats. If you were good enough to win a game, you can steal a player from the team that you just beat and add them to your squad.

TO ADD A PLAYER FROM AN OPPOSING TEAM:
From the Update Team screen, highlight the portrait of the player you want to add and press the X button. That player is removed from their current roster and added to your team. The next time you play, their name appears on your team roster.

Note
You can only have a maximum of five players on your team. If you choose to add a player when your roster is full, you must replace a player from the current lineup.

EDIT BALLER
After every game, game stats tell you if you earned any Development Points for your baller. If so, you're in luck.

Once a game ends, you return to The Map screen. From here, you have the option to edit your baller; assuming you earned some Development Points. Be sure to add some sweet attributes or new moves to your playa before playing the next game. After all, the games get tougher as you move on.

Street School
Learn the skills of the street game with the help of Street Legend and your mentor; Stretch.

• During a practice session, you ball on the court one lesson at a time. During your training, you'll learn everything there is to know—from the basics to some of the more advanced moves in NBA STREET Vol. 2.
• If you fail to complete a lesson the first time, don't worry. You'll get to run the drill again until you get it right.
• Once all of the lessons are complete, you graduate from Street School with some mad skills.

Note

My Team

Create a baller from scratch and build him into a legend, or put together basketball's greatest street team.

Create A Baller

When creating a baller, you don't have a lot of Development Points to work with. Your first created baller has limited skills as a rookie. However, you can earn more Development Points during gameplay. In short, the better you play, the more development points you earn.

After you begin playing your first Be A Legend games, remember that the more Trick Points you earn during a game, the more Development Points you'll get as a reward. You also get Development Points for Gamebreakers, both Level 1 and Level 2. Once the game ends, take the Development Points and add them to your baller's attributes.

To Create A Baller:
1. From the My Team menu, select CREATE A BALLER.
2. From the Create A Baller screen, highlight an empty slot and press the × button. Next, choose MALE, FEMALE, or PREMADE and press the × button again. The Create Baller screen appears.
3. From the Create Baller screen, choose your player's build. Press the D-button or left analog stick to select a height and press the D-button or left analog stick to choose a body type. Once you've found a Build that's right for you, press the × button to advance to the next stages including Look, Hair, Facial Hair, Outfit, Skills, and Name.
   ◀ If you want to go back and edit an attribute, press the L1 button or R1 button.
   ◀ When changing a player option, press the D-button or left analog stick to toggle the choices. Once you find an option that you like, press the × button.
4. If you choose to play with a Premade baller, you can select which baller you want to run with as they have a pre-assigned set of skills and attributes.

Edit Moves

From the Edit Moves screen, use your Development Points and edit your player's moves. Improve your game with moves that make any highlight reel. Your created baller already comes equipped with a handful of show-stoppin' moves, but why not upgrade them and shine on the court like nobody's business?

To access the Edit Moves screen, press the ◀ button from the Edit Baller screen or by selecting a created baller in the Create a Baller menu, then selecting Edit Moves.

To Edit A Move:

3. Choose a move that you wish to add to your repertoire and press the × button to begin the purchase process. If you wish to preview the move press the ◀ button. After a move is selected, highlight YES and press the × button again to purchase the move (assuming you have enough Development Points).
4. After a move is purchased, it will replace the move that you chose to edit. This move can now be performed using the same button combination as the move you replaced.

Create Team

Create your own squad of all-stars and add them to the mix. All unlocked players are available to choose from—you can pick five. Once a team is created, it's added to the Choose Team menu in all game modes (except Be A Legend mode).

To Create Your Own Team:
1. Select CREATE TEAM from the My Team menu.
2. From the Create Team screen, highlight the player of choice and press the × button. The selected player is added to your lineup. (To toggle between the available NBA PLAYERS, STREET LEGENDS, NBA LEGENDS or CREATED BALLERS, press the L1 button or the R1 button.)
3. After you have selected your five ballers, the Where's Your Team From prompt appears. Enter the name of where your team comes from.
